

I am requesting that Low Power FM (LPFM) stations NOT be given a priority over FM translator service. I listen to K-LOVE radio in San Antonio, TX. I do not want to lose my K-LOVE signal. K-LOVE provides the only Christian FM radio station in my area, and the ONLY Christian radio I receive clearly. This form of radio is very important to me. It is the only station I listen to. Christian radio gives me a sense of peace and security in the turbulent world we live in. It provides a Christian message to many listeners in my city. K-LOVE operates as a non-profit organization and relies on listener donations to stay in operation. San Antonio is consistently one of the K-LOVE cities which receives full donations each month to remain on air. This means that there are many people besides me that are loyal listeners to K-LOVE. I donate money each month to help keep this radio station on the air. There are numerous ways that K-LOVE serves both me and my community. K-LOVE provides prayer support to anyone who calls in and needs it. This station provides mission work around the world. These mission needs get invaluable publicity to reach thousands of people around the world who are then called into action to help others. If that is not serving the public interest then I don't know what would be. K-LOVE has helped people in natural disasters worldwide through financial support, volunteer service, and prayer support. Many thousands of lives are changed by K-LOVE pastors providing free, confidential, Christian counseling. The effect of this station's signal being stopped would be personally devastating to me. I rely on Christian radio to carry me through my daily life with wonderful, positive, and entertaining music and messages. I also feel it would be a huge loss to our community if K-LOVE was lost. Thank you for your time. I hope that my opinions are valued and taken seriously.
